

# CHOICE COMMUNICATIONS

August 2020

## INVEST IN SOLUTIONS

What's New in Business Communications!

Greetings,

Choice Communications is about bringing our clients best in-class business communications and hosted telephony solutions. As you know, Covid-19 has changed the way we do business especially how we use communications & technology to stay connected. **"Invest In Solutions"** is our monthly newsletter that will bring you **NEW** information on key features & functionality of our business communications platform plus key insights on how these features may enhance other business processes like customer service and working remote.

Speaking of working remotely this month's key feature – Max UC.

## Max UC – Unified Communications As A Service

*It's no longer enough to have a business communications system only for voice calls from a desk phone.*

### Empower Your Always-On Workforce

- ❖ Communicate over multiple channels – voice, video, email and messaging.
- ❖ Anywhere, Anytime, Any Device

### Meeting Webinar

- ❖ On-line web & video events

### Meeting Webinar – Integration! Any Device!

- ❖ Collaboration On-The-Go!

Max UC integrates your mobile devices i.e. smart phones, laptops, and tablets, onto your communications platform where you can stay connected with your business and clients anywhere & anytime! On caller ID it's your main business number that appears not your personal cell number. Loss of power or internet – no longer an issue – calls can be answered on your mobile devices!

For more information please give us a call! 863-393-9711
